President's Message

To Transform into an “Innovative Solution Provider.”

Key Word

- Long-term Goal “Innovative Solution Provider.”
- Solves societal issues through innovative technologies in four areas: “Food,” “ICT,” “Healthcare,” and “Environment.”
- The key point of business sectors reorganization is to focus on areas that can contribute to solving societal issues.
- Envision continuously creating innovative solutions by leveraging our three key assets—GX, DX, and BX.
- Adapting to the changing times through a shift in mindset.
- Face change head-on without fear and envision necessary actions quickly and execute them steadily.

Regarding President's Message, please refer to the Annual Report 2024.

Representative Director & President

Sumitomo Chemical's Corporate Philosophy

Sumitomo Chemical's business began when gasses from the copper smelting process of the Besshi Copper Mine caused a pollution problem, and there was an urgent need for a solution. Sumitomo Chemical was founded to resolve this problem, which it did by extracting sulfur (sulfur dioxide gas) from copper ore to use as the raw material for sulfuric acid and fertilizer manufacturing in an effort to overcome an environmental problem while also improving agricultural productivity. This philosophy of resolving problems facing society through its business is in the DNA of the Sumitomo Chemical Group.

Sumitomo Chemical's Corporate Philosophy is based on Sumitomo's Business Principles and is composed of the Business Philosophy, which integrates the company's business principles, mission and values; Basic Principles for Promoting Sustainability, which integrates its concepts regarding and commitment to sustainability promotion; and the Sumitomo Chemical Charter for Business Conduct, which lays out the code of behavior serving as the basis for the Company's compliance system.

■ The Framework of Sumitomo Chemical's Corporate Philosophy

What Sumitomo Chemical Group Strives to Be

The Basic Principles for Promoting Sustainability defines the promotion of sustainability as contributing to the realization of a sustainable society through our business and achieving sustainable growth for the Group, thereby aiming to enhance the Group's corporate value. We will continue to pursue our principle of "*Jiri-Rita Koushi-Ichinyo*," creating both economic and social value and increasing our corporate value along the two axes of *Jiri* and *Rita*—with the *Jiri* axis for economic value and the *Rita* axis for social value.

In recent years, awareness of sustainability has been rising around the world, focusing not only climate change but also ecosystem conservation and healthy lives. The Company has broadly defined this as green transformation (GX) and considers it an opportunity to transform itself and contribute to society. Going forward, we aim to contribute to solving social issues through business by transforming our business portfolio over the long term from a GX perspective.

■ Image of Enhancing Corporate Value

What We Strive to Be Achieve sustainable growth for the Sumitomo Chemical Group and realize a sustainable society by creating both economic and social value

Jiri-Rita Koushi-Ichinyo* Our businesses must benefit society at large, not just our own interests.

GX We contribute to solving social issues through business by promoting the broadly defined green transformation (GX) of climate change, ecosystem conservation, and healthy lives.
